

BI Solutions

Data. Management. Performance.

CAPABILITY STATEMENT

Data Warehousing | Business Intelligence

BI Solutions, Incorporated (BISI) is a certified woman-owned small business providing consulting services with cutting-edge data warehousing and business intelligence solutions. We specialize in rapid web-based reporting systems for the US Government and private industry and are experts in the implementation of the industry's leading business intelligence, performance management and budgeting tools. Our company leverages best of breed toolsets to create comprehensive reporting solutions that can be seamlessly merged with any existing enterprise reporting software and we bring decades of design, implementation and maintenance expertise to your organization.

What sets BISI apart from the competition?

- Our People
- Performance-Based Processes
- Strategic Mix of Technology and Business
- Client Relationship Management
- Integrated Solutions Teams

Core Capabilities

BI Solutions offers the highest quality database modeling, database administration and business intelligence reporting in a manner that provides substantial return on investment for our clients. Our technology experts and business professionals analyze, research, design and implement solutions in the areas of:

- Data Warehousing
- Business Intelligence/Analytics

Our consultants focus on integrated solutions designed to enhance the performance of your business. By incorporating industry best practices into your business processes and management strategies, we can help you stay ahead of the competition and better serve your customers. Our services include:

- Database Design, Development, & Maintenance
- Data Visualization
- Data Cleansing & Conversion
- Dashboards
- Scorecards

BI Solutions also offers select hardware and software products targeted to support our consulting efforts in Data Warehousing and Analytics. Our Business Intelligence/Analytics offerings are designed to provide information to optimize business decisions for robust forecasting and accurate measures.
