BI Solutions
Data. Management. Performance.

Cognos Analytics Upgrade Service

Make the most of your Cognos subscription by upgrading to the current version.

Cognos Analytics represents a tremendous advancement for customers. The new user interface provides upgrades in dashboarding, reporting, modeling, customization and visualizations. However, these new features require a new knowledge and understanding of Cognos functionality. Our expert staff has experience performing upgrades for customers in the federal government and healthcare industry and we can help you too.

Utilizing BI Solutions' Cognos Analytics Upgrade Service dramatically reduce the time and learning curve demands on your staff, helping you clear the technical hurdles so you can take advantage of the new features of your investment and avoid unexpected downtime, interruption, and disruption of your staff's daily routines.

Our experts will:

- train and mentor your staff on the new capabilities and changes to existing features,
- properly install and configure your content for the greatest benefit from new features, and
- accelerate the upgrade process.

With the end of IBM support of Cognos 10, it makes sense to **maximize your investment** now by taking advantage of the newer features and **minimizing the risk** of running unsupported software. BI Solutions is ready to help you successfully transfer from the old to the new.
