**BI Solutions, Inc. Celebrates its 15 Year Anniversary**

*Harrisburg based business intelligence and data warehousing consultancy celebrates 15 years of service to federal and state government, private business and higher education.*

**Harrisburg, PA - Jan 22, 2018** - BI Solutions, Inc. (BISI) has reached a milestone this month, celebrating 15 years of business. One of the many highlights of BI Solutions' past 15 years occurred in August when BISI staff traveled to the Pentagon to be presented with The Admiral Stanley R. Arthur Award by Vice Admiral Smith. This national award recognized excellence in BI Solutions' work with the US Navy in logistics planning and execution on the LOGCELL (Logistics Cell) project which transformed the Navy's supply chain reporting.

Employees and their spouses joined in a celebratory dinner recently. "We have weathered challenging economic times of the past 15 years because of the quality of our employees. It is a testament to their hard work and effort that we are here today and I'm glad they are all a part of the BISI family", president Erica Bryce commented.

BISI prides itself in offering large company benefits and a friendly family atmosphere of a small business.
