

CAPABILITY STATEMENT

Data Warehousing | Data Analytics | Business Intelligence

BI Solutions, Inc. is a dynamic small business specializing in innovative data warehousing, analytics, and business intelligence enterprise reporting services. For over 20 years, we have proudly delivered award-winning solutions to both the US Government and private sector.

Core Capabilities

BI Solutions offers the highest quality services utilizing best of breed toolsets in the following areas:

- Data Warehousing: Master Data Management, Data Governance, Data Engineering (ETL/ELT), Data Cleansing
- Business Intelligence: Authored Reporting, Ad-hoc Reporting, Data Modeling
- Data Analytics: Advanced Analytics, Data Visualization, Dashboards
- Database Administration: Database Modeling, Development, Maintenance
- Application Administration: Installation, Configuration, Maintenance, Troubleshooting, Performance Tuning
- Cloud Computing and Migration: AWS and Microsoft Azure

The BI Solutions Advantage

BI Solutions helps you stay ahead of the competition and better serve your customers by:

- Providing technical consultants who have extensive experience with technologies including IBM Cognos Analytics, SAP Business Objects, Tableau, Power BI, Qlik, Informatica, Oracle, Teradata, Microsoft SQL Server, PostgreSQL, Yellowbrick, Python, Panda, EC2, RDS, S3, Data Factory, Synapse Analytics, and Azure Functions.
- Developing strategic teams of technical and business personnel to ensure the technical solution meets the business requirements.
- Incorporating industry best practices into our technical implementation to build secure, robust and reliable solutions.
